EC52 ESCALATOR CLEANER

The Eureka EC52 escalator cleaning machine cleans dirty escalators and travelators in just minutes, with very little human labour involved.

The EC52 effectively removes grease, spillages, stones, foreign objects, hardened sand and grinding, which could damage the escalator combs and steps, improving the overall appearance of your facility and prolonging your escalator durability.

ONE MACHINE DOES IT ALL

The Eureka EC52 is amazingly versatile and value efficient as it can also be used as a traditional scrubber dryer machine for the cleaning of hard floors.

VALUE ADDED FEATURES

The Eureka EC52 boasts a revolutionary double roller brush cleaning system which aggressively lifts and removes all debris from the escalator steps.

The exclusive brush head rotates 180° to clean both sides of the escalator independently from the width of the steps.

The EC52 can work automatically, thus guaranteeing a perfect result even if the operator is busy with other applications.

The EC52 is supplied as standard with a great array of cleaning accessories which make the machine the most complete, versatile and effective on the market.

Technical Data
