

PTS ENCAP CARPET CLEANING GUIDE

This document should be used as a quick reference guide only, all operators must familiarise themselves with the relevant equipment, products & accompanying documentation including user manuals, product information sheets and material safety data prior to using any products or equipment

Caution:
before cleaning, test a small area with shampoo solution to ensure colourfast

1. Vacuum carpets
2. Prepare machine for use
3. Pre-spray any stains or high traffic areas
4. Fill solution tank with clean water & Encap low moisture solution
dilution rate
light soiling - 1:16 (325ml per 5L)
heavy soiling - 1:10 (500ml per 5L)
5. With machine running apply solution to the carpet until thin white foam is obtained, do not over-wet the carpet
6. Carry out 1 wet pass followed by 2-3 dry passes
7. Repeat above if necessary for any heavily soiled areas
8. Rinse out tank
9. Carpet will be touch-dry in 1hr approx.
but allow overnight drying for full encapsulation process to take place
10. Remove encapsulated dirt by routine vacuuming (the next day)
